ABOUT

I am a passionate, hard-working entry-level front-end web developer. My aim is to make people's lives better & easier by creating beautiful and useful software. As a developer, I am constantly seeking new challenges and opportunities to learn and grow. I enjoy staying up to date with the latest industry trends and exploring emerging technologies. Overall, I am excited about the opportunity to apply my skills and contribute to a dynamic and innovative team. I am eager to take on new challenges and I am confident in my ability to create engaging applications.

PROJECTS

BeatsXchange: e-commerce website

Live website   **Repository**

React, NextJS, TypeScript, TailwindCSS, Prisma, MongoDB

- Built a full-stack audio store where you can authenticate, browse products, add them to your cart, read and write reviews.
- All the products are stored in a MongoDB database and queried with Prisma.
- The back-end is built with NextJS server actions.
- Implemented authentication using Clerk.
- Built an admin panel where administrators can and add, modify and remove products from the database.

Wordpress.com website clone

Live website   **Repository**

React, NextJS, TailwindCSS

- Implemented responsive and dynamic user interfaces that closely resemble the original website's design.
- Utilized React components to modularize the code base, promoting reusability and maintainability.
- Utilized static site generation(SSG) in Next.js to enhance SEO and page load speed by providing the client with pre-rendered static HTML pages.
